

### **Mr President, let's #MaskMzansi!**

Dear President Ramaphosa

You have truly led South Africa by example, with grace, grit, humility, humour and courage.  
**We love you for it, thank you!**

We now call on you to [keep your promise](#) to teach us how to wear masks correctly and safely, please? If you release a short **#MaskMzansi** video in all official languages, including sign language, and zero-rated (i.e. free for all to share digitally), we will make it go viral to **nqoba COVID-19!**

Please also share detailed, freely available information about how and where we can access appropriate quality masks, especially if we are unable to make or buy our own.

In response, we will post and share our efforts to **#MaskMzansi** creatively, cleverly, and above all, with the same extra-sharp uniquely South African wit and brilliance.

We thank you, Mr President!
